[ACES Renewables and its subsidiaries are collectively referred to as the "Group"]

ABRIDGED AUDITED CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2023

DIRECTORS' COMMENTARY & COMPANY OVERVIEW

The financial year ended 30 June 2023 has been eventful. The rise in global central bank policy rates to fight inflation, continues to weigh on worldwide economic activity.

Financial results review

The Group made a loss of \$1.6m for the year ended 30 June 2023.

Revenue of \$501k was derived from rooftop solar installations. Revenue from rooftop installations in South Africa is expected to increase to over \$1.5m in 2024. By its nature, rooftop installation revenue is not earned in a steady stream. Consequently, the Group recognizes the need to produce steady streams of annuity income, which is why it is in the process of developing ground-mounted solar projects. Revenue from this source is expected to be in the region of \$1.5m for the year ending 30 June 2024.

Kenya, Uganda and Zambia

Our projects in Kenya, Uganda and Zambia are denominated in US\$ and as such are protected against any local currency fluctuations. Although the US federal reserve raised interest rates from 1.75% in July 2022 to 5.25% by the end of June 2023, it has had little impact on these east-African projects as they are in the permitting phase, implying that construction is yet to begin and therefore no debt has yet been raised. We expect to have completed the permitting phase towards the end of 2024, beginning of 2025. At this point, the Company would have raised enough capital to begin the construction phase.

- Kenya has been delayed due to a new president being elected and the replacement of the key staff at Kenya Power and Lighting Company (KPLC). Our Kenyan subsidiary, Tana Biomass has commenced discussions with KPLC, who has advised Tana Biomass that the project is still required and the main issue in the discussion is a revision of the Tariff.
- The Uganda Electricity Distribution Company (UEDCL) requires a detailed feasibility study to be finalized. Although the Tariff has been agreed the Power Purchase agreement will only be signed against a presentation of a feasibility study. This study has commenced and is expected to be completed in the second guarter of 2024.

• The project in Zambia requires a feasibility study to be completed. Our partner in Zambia, The University of Fort Hare has obtained support from the Zambia Electricity Supply Corporation (Zesco) to proceed with the study.

South Africa

During the financial year, the Group continued with the implementation of its strategy. This is two-fold, being both a short-term and a long-term strategy. The short-term strategy is to concentrate on rooftop solar installations for commercial and industrial (C&I) clients. We installed a total of 800kW and have a number of proposals awaiting finalization. In 2022, the country experienced 208 days in which power was curtailed. This is expected to increase to 49 weeks in 2023. We have noticed that there is a heightened demand for C&I installations, as it is estimated that Eskom is currently unable to meet demand by up to 9,000MW. This is reflected in the fact that we have 15 proposals being considered by various clients, to the tune of 8MW in total.

In addition as part of our long-term implementation strategy, we have begun to develop 2 ground-mounted solar (GMS) projects; which will produce 192MW DC when completed. This is Phase 1 of our GMS pipeline. Our subsidiary, SACE Projects has secured appropriate land with an appropriate Eskom connection, under a 25-year lease. We are currently in the permitting phase. Consultants have been appointed to obtain the necessary permits and licences, such as the EIA, water licence, topographical and geological surveys and Eskom grid studies, to name a few. This is a timely and costly process. We expect to complete this phase by Q2 2024. On completion, the projects are deemed 'shovel ready'. Each project will either be sold, or capital will be raised in order for us to begin the development and construction of the solar farm. Each project will generate a development fee, whether we decide to sell the projects or keep them. This development fee will facilitate the ability for us to begin the permitting phase on our planned GMS phase 2; which will again be 3 projects with a total of 300MW. We have a number of interested parties in the energy that these GMS projects will produce and are in the process of finalizing letters of interest (LOI) from these potential off-takers. These LOIs will be converted into power purchase agreements (PPA) the closer the projects become to shovel ready.

Fund raising

During the year, we raised capital by an issue of new shares in ACES Renewables. In addition, we have a number of interested parties, who have indicated interest in investing in the Group by acquiring equity or providing debt, or both. This is a direct result of the strategy we adopted at the beginning of the financial year, where we decided to grow into the GMS space. As stated above, not only will this strategy allow us to receive development fees, but in the instance where we retain an equity stake in the GMS, it will provide strong annuity income flows.

The Directors are optimistic that the next twelve months will positively shape the future of the Company.
